

INFRASTRUCTURE YOU CAN COUNT ON

Public Water Supply District No. 2's goal is to plan, deliver, and maintain reliable public water and sewer infrastructure serving St. Charles County. Cole serves as the District Engineer, providing engineering, inspection, and program management services in close coordination with PWSD#2 leadership, the District's Board, and operations staff.

This partnership supports the District's annual budget and seven-year Capital Improvement Program, management of design consultants, construction management and inspection for capital projects, GIS system management, and review of private development plans to ensure compliance with District standards. Together, PWSD#2 and Cole also engage the community through public outreach and project open houses, promoting transparency, continuity, and long-term system reliability.
